CCR No. 97-0041	Logged Date 1/13/97	Rev. -	Request Type CCR																				
Priority Routine <input type="checkbox"/> Urgent <input checked="" type="checkbox"/> Emergency <input type="checkbox"/>	Affected Release B	Change Class II																					
Title (description) Remove Rel A Databases from Sybase Server OTIS																							
Documents Affected None		Source Nos (RID, NCR, Action Item, GSFC CCR, etc.) or Tech Reference None																					
RTM Change <input type="checkbox"/>	Start New Baseline <input type="checkbox"/>																						
Problem "OTIS", an Infrastructure machine, is Rel A Sybase Server being assigned for Rel B Sybase Use.																							
Proposed Solution Have any existing Release A Sybase tables backed up and removed from "OTIS". If Release A prefers to have these tables moved to "MILO" then the requested tables should be transferred to continue support of the Release A Testbed efforts. Sybase Backup Server SW should be installed on "OTIS" to allow recovery of any databases, including the master database. This does not currently exist. The version of Sybase currently installed (11.0.1) is the Rel B baseline version and should remain. The requested databases listed in CCR96-1448 (Sybase 11 databases for Rel B subsystems) should then be installed on "OTIS", with the exception of item #1, Ingest. The Ingest tables (Item #1, CCR96-1448) should be installed on the SGI Rel Dev machine RELBSGI. RELBSGI is an existing Sybase server.
